

Corine Land Cover (CLC)

The CORINE (Co-Ordinated Information on the Environment) is an European programme, coordinated by the European Environment Agency (EEA) providing consistent information on land cover and land cover changes across Europe. The CORINE (2018) land cover distributions are shown across the scheme area in the adjacent map.

The scheme area is primarily made up of industrial/commercial/urban fabric surrounded by pastures/open space. CLC has a wide variety of applications, underpinning various community policies in the domains of environment, agriculture, transport, spatial planning and more.
