PREAMBLE

ARTERIAL DRAINAGE ACTS, 1945 AND 1995

(NO. 3 OF 1945 AND NO. 14 OF 1995)

DRAINAGE SCHEME PREPARED BY THE COMMISSIONERS OF PUBLIC WORKS IN IRELAND
FOR PART OF THE GLASHABOY RIVER AND ITS TRIBUTARIES AT GLANMIRE IN THE COUNTY OF CORK

We, the Commissioners of Public Works in Ireland, being of the opinion that the execution of arterial drainage works is expedient in respect of a part of the Glashaboy River in the County of Cork, for the purpose of preventing or substantially reducing the periodical localised flooding of lands in the area of that watercourse or such a part or of improving by drainage lands in that area, have prepared a scheme to be known as the **Glashaboy River (Glanmire/Sallybrook) Drainage Scheme** for the execution of such works, particulars of which scheme are shown in the Schedules, Maps and Section Drawings hereunto annexed. The scheme has been prepared for the purpose of preventing or substantially reducing localised flooding.

The waters and watercourses proposed to be dealt with are shown in **BLUE** colour on the drawings. The lands to be drained or otherwise improved are shown in **GREEN** on the drawings (drawing numbers GR_104, GR_105 and GR_106). The chainages in metres along each channel are also shown on the drawings.

The drainage works proposed to be executed are mentioned and described in Schedule A.

The lands proposed to be compulsorily acquired or substantially interfered with, the easements, fisheries, water rights, navigation rights and other rights proposed to be compulsorily acquired, restricted, terminated or otherwise interfered with and the roads and bridges (whether public and private) proposed to be diverted, removed or otherwise interfered with are mentioned and described in Schedule B.

The reputed proprietors, owners and rated or other occupiers of the several lands proposed to be compulsorily acquired or substantially interfered with and of the several easements, fisheries, water rights, navigation rights and other rights and private roads and bridges proposed to be compulsorily acquired, restricted, terminated or otherwise interfered with are set forth in the said Schedule B.

The respective aggregate annual values (at the time of preparation of the scheme) of the portions of the benefited lands situated in the County of Cork and the several total increases in the annual values of these portions respectively which will probably arise in consequence of the execution of the scheme are shown in Schedule C.

The area proposed to be constituted a separate Drainage Scheme comprises the waters and watercourses proposed to be dealt with and the lands which will be drained or otherwise improved.

In Witness whereof, we, the Commissioners of Public Works in Ireland, have caused our Common Seal to be hereunto affixed this 24th day of May 2018.

SCHEDULE A	6
SCHEDULE B	33
SCHEDULE B1	287
SCHEDULE C	290

ABBREVIATIONS

Works proposed to be executed and properties proposed to be interfered with are indicated on maps and in Schedules A and B with letter prefixed as follows:

B	BRIDGES/CULVERTS
C	CHANNELS
E	EMBANKMENTS
F	BOUNDARY
G	GENERAL INTERFERENCES
L	WALLS AND BUILDINGS
P	PUMP INSTALLATIONS
R	ROADS / REGRADING
SL	SLUICES

LIST OF WATERCOURSES

GLASHABOY RIVER (GLANMIRE/SALLYBROOK) DRAINAGE SCHEME

Watercourse Number	Watercourse Name
C01	Glashaboy River
C02	Mill Race 1
C03	Mill Race 2
C04	Butlerstown Stream
C05	Glenmore Stream
C06	Springmount Stream
C07	Cois na Gleann Stream
C08	Mill Race 3
C09	Bleach Hill Stream
C10	Sallybrook Stream

Arterial Drainage Acts, 1945 and 1995

Glashaboy River (Glanmire/Sallybrook) Drainage Scheme

In the County of Cork

Schedule A

The works proposed to be executed in the course of the Glashaboy River (Glanmire/Sallybrook) Drainage Scheme.

Drawing references				Interference references				Description of Interference	
Plan No. (GR_XXX)	Section Drawing No. (GR_XXX)	Works Finishes Drawing No. (GR_XXX)	Possible Access Routes & Work Areas Drawing No. (GR_XXX)	Watercourse No.	Interference Type	Interference Reference	Location & Channel Chainage (m)	Scheme Element Chainage (m) (DS-US)	General Description of Proposed Works
201	301	N/A	501	C09	B	C09_B01	132 to 145	0 to 13	Replace existing twin 0.9m diameter culverts with new 2.6m wide by 2.4m high rectangular culvert. Service diversions associated with the culvert reconstruction will be required locally.
203	N/A	N/A	501	C10	B	C10_B01	0 to 3	0 to 3	The existing stretch of open channel is to be culverted through a proposed 900mm diameter concrete culvert and will outfall into the Glashaboy River at C01_5311. All drainage outfalls to be fitted with non-return valves. Upstream flow to be diverted through C10.1_B01.
202, 203	301	N/A	501	C10.1	B	C10.1_B01	0 to 165	0 to 165	Channel C10 to be realigned along the line of C10.1. The Stream is to be culverted in a 900mm diameter concrete culvert from chainage zero at the outfall into the Glashaboy River at C01_5300, which will be a free flowing outlet. The culvert will extend as far back as works chainage 165 where it will tie into the culvert which crosses under the R639. All drainage outfalls within the culvert will be fitted with a non-return valve.
206	302	N/A	502	C07	B	C07_B01	75 to 87	0 to 12	Existing culvert to be replaced with a new 2.75m wide by 0.9m high rectangular culvert. Service diversions associated with the culvert reconstruction will be required locally.
206	302	N/A	502	C07	B	C07_B01	87 to 89	12 to 14	Existing open channel section to be culverted with a new 2.75m wide by 0.9m high rectangular culvert. Service diversions associated with the culvert reconstruction will be required locally.

Drawing references				Interference references				Description of Interference	
Plan No. (GR_XXX)	Section Drawing No. (GR_XXX)	Works Finishes Drawing No. (GR_XXX)	Possible Access Routes & Work Areas Drawing No. (GR_XXX)	Watercourse No.	Interference Type	Interference Reference	Location & Channel Chainage (m)	Scheme Element Chainage (m) (DS-US)	General Description of Proposed Works
206	302	N/A	502	C07	B	C07_B01	89 to 101	14 to 26	Existing culvert to be replaced with a new 2.75m wide by 0.9m high rectangular culvert. Existing trashscreen upstream to be removed from the culvert. Service diversions associated with the culvert reconstruction will be required locally.
207	303	N/A	502	C01	B	C01_B02	3978 to 3995	0 to 17	Proposed 6.2m wide by 1.75m high rectangular flood relief culvert to be constructed. Service diversions associated with the culvert construction will be required.
207	304	N/A	502	C01	B	C01_B03	3888 to 3901	0 to 13	Replace existing bridge with a new reinforced concrete bridge. Bridge to be 13.50m clear span. Proposed bridge soffit level to be 12.3mOD (approximately 1.85m above existing bridge soffit).
208	305	N/A	502	C06	B	C06_B01	73 to 105	0 to 32	Replace existing twin 0.4m diameter culverts with a new 1.75m wide by 0.9m high rectangular culvert.
211	307	N/A	502	C05	B	C05_B01	655 to 666	0 to 12	Replace three existing culverts, (2.32m span arch, 2.95m wide by 0.68m high culvert and 2.95m wide by 0.67m high culvert) with 2 no. rectangular culverts each 5m wide by 1.95m high. Service diversions associated with the culvert reconstruction will be required.
211	307	N/A	502	C05	B	C05_B02	588 to 600	0 to 12	Replace existing bridge with a new reinforced concrete bridge. Bridge to be 10m clear span. Proposed bridge soffit level to be 13.79mOD (approximately 0.33m above existing bridge soffit). Service diversions associated with the bridge reconstruction will be required.
216	307	N/A	502	C05	B	C05_B03	952 to 976	0 to 24	Replace existing 4.93m wide by 1.57m high culvert with a new reinforced concrete bridge. Bridge to be 8.25m clear span. Proposed bridge soffit level to be 17.43mOD.

203, 204	302	401	501	C01	L	C01_L01	4978 to 5030	102 to 150	Proposed reinforced concrete flood defence wall to be constructed to flood defence level of 18.50mOD (typically 1.60m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
203, 204	302	401	501	C01	L	C01_L01	4936 to 4978	64 to 102	Proposed reinforced concrete flood defence wall to be constructed to flood defence level of 18.19mOD (typically 1.45m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
204	302	401	501	C01	L	C01_L01	4886 to 4936	20 to 64	Proposed reinforced concrete flood defence wall to be constructed to flood defence level of 17.87mOD (typically 1.20m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
204	302	401	501	C01	L	C01_L01	4869 to 4886	0 to 20	Proposed reinforced concrete flood defence wall to be constructed to flood defence level of 17.55mOD (typically 0.80m above existing ground levels). All drainage outfalls to be fitted with non-return valves. Proposed flood defence wall to tie into high ground.
206, 207	303	401, 402	501, 502	C01	L	C01_L02	4024 to 4047	132 to 156	Proposed reinforced concrete flood defence wall to be constructed to flood defence level of 13.61mOD (typically 0.50m above existing footpath level). All drainage outfalls to be fitted with non-return valves.

208	304	402	502	C01	L	C01_L04	3796 to 3806	0 to 8	Proposed reinforced concrete flood defence wall to be constructed to 11.59mOD flood defence level (typically 1.05m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
208	N/A	402	502	C06	L	C06_L04	100	0 to 40	Proposed reinforced concrete retaining wall to be constructed (typically 2.1m above existing ground levels) to retain raised road levels. Vehicular access to existing properties to be maintained.
208	N/A	402	502	C06	L	C06_L01	70 to 73	406 to 411	Proposed reinforced concrete flood defence wall to be constructed above flood defence level to 14.70mOD (typically 2.5m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
208	N/A	402	502	C06	L	C06_L02	87	0 to 48	Proposed reinforced concrete retaining wall to be constructed (typically 1.96m above existing ground levels) to retain regraded road levels.
208	N/A	402	502	C06	L	C06_L03	12 to 29	0 to 18	Proposed reinforced concrete flood defence wall constructed to 11.59mOD flood defence level (typically 0.95m above existing ground levels). The flood defence wall is to tie into high ground to the west. All drainage outfalls to be fitted with non-return valves.

Plan No. (GR_XXX)	Section Drawing No. (GR_XXX)	Works Finishes Drawing No. (GR_XXX)	Possible Access Routes & Work Areas Drawing No. (GR_XXX)	Watercourse No.	Interference Type	Interference Reference	Location & Channel Chainage (m)	Scheme Element Chainage (m) (DS-US)	General Description of Proposed Works
208	N/A	402	502	C06	L	C06_L01	0 to 73	329 to 406	Proposed reinforced concrete flood defence wall to be constructed to 11.59mOD flood defence level (typically 1.33m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
208	305	402	502	C01	L	C01_L05	3716 to 3782	258 to 329	Proposed reinforced concrete flood defence wall to be constructed to 11.59mOD flood defence level (typically 1.50m above existing ground levels). The wall will be constructed on the Meadowbrook estate side of the existing wall to preserve the trees along the Glashaboy River bank. All drainage outfalls to be fitted with non-return valves.
208	305	402	502	C01	L	C01_L05	3674 to 3716	197 to 258	Proposed reinforced concrete flood defence wall to be constructed to 11.37mOD flood defence level (typically 2.15m above existing ground levels). The wall will be constructed on the Meadowbrook estate side of the existing wall to preserve the trees along the Glashaboy River bank. All drainage outfalls to be fitted with non-return valves.
208	305	402	502	C01	L	C01_L05	3595 to 3674	125 to 197	Proposed reinforced concrete flood defence wall to be constructed to 11.00mOD flood defence level (typically 2.10m above existing ground levels). The wall will be constructed on the Meadowbrook estate side of the existing wall to preserve the trees along the Glashaboy River bank. All drainage outfalls to be fitted with non-return valves.

GLASHABOY RIVER (GLANMIRE/SALLYBROOK) DRAINAGE SCHEME

Drawing references				Interference references				Description of Interference	
Plan No. (GR_XXX)	Section Drawing No. (GR_XXX)	Works Finishes Drawing No. (GR_XXX)	Possible Access Routes & Work Areas Drawing No. (GR_XXX)	Watercourse No.	Interference Type	Interference Reference	Location & Channel Chainage (m)	Scheme Element Chainage (m) (DS-US)	General Description of Proposed Works
208	305	402	502	C01	L	C01_L05	3533 to 3595	83 to 125	Proposed reinforced concrete flood defence wall to be constructed above flood defence level to 10.67mOD (typically 2.40m above existing ground levels). The wall will be constructed on the Meadowbrook estate side of the existing wall to preserve the trees along the Glashaboy River bank. All drainage outfalls to be fitted with non-return valves.
208	305	402	502	C01	L	C01_L05	3484 to 3533	41 to 83	Proposed reinforced concrete flood defence wall to be constructed to 10.29mOD flood defence level (typically 2.38m above existing ground levels). The wall will be constructed on the Meadowbrook estate side of the existing wall to preserve the trees along the Glashaboy River bank. All drainage outfalls to be fitted with non-return valves.
208	305	402	502	C01	L	C01_L05	3457 to 3484	0 to 41	Proposed reinforced concrete flood defence wall to be constructed to 9.90mOD flood defence level (typically 1.70m above existing ground levels). The wall will be constructed on the Meadowbrook estate side of the existing wall to preserve the trees along the Glashaboy River bank. All drainage outfalls to be fitted with non-return valves. Proposed wall to tie into high ground at Riverstown Bridge.

216	N/A	402	502	C05	L	C05_L02	940 to 953	50 to 63	Proposed reinforced concrete flood defence wall to be constructed above flood defence level to 19.58mOD (typically 2.42m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
216	N/A	402	502	C05	L	C05_L03	975 to 998	0 to 23	Proposed reinforced concrete flood defence wall to be constructed above flood defence level to 19.75mOD (typically 2.41m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
216	N/A	402	502	C05	L	C05_L03	998 to 1008	23 to 33	Proposed reinforced concrete flood defence wall to be constructed above flood defence level of 19.38mOD (typically 2.07m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
216	N/A	402	502	C05	L	C05_L03	1008 to 1018	33 to 43	Proposed reinforced concrete flood defence wall to be constructed above flood defence level of 18.90mOD (typically 1.55m above existing ground levels). All drainage outfalls to be fitted with non-return valves.
214	308	403	503	C01	L	C01_L08	1935 to 2075	38 to 184	Proposed reinforced concrete flood defence wall to be constructed to a minimum flood level of 3.73mOD (or 1.20m above existing footpath levels). All drainage outfalls to be fitted with non-return valves.
214	308	403	503	C01	L	C01_L08	1897 to 1935	0 to 38	Existing wall to be strengthened. All drainage outfalls to be fitted with non-return valves.

GLASHABOY RIVER (GLANMIRE/SALLYBROOK) DRAINAGE SCHEME

SCHEDULE A: PUMP INSTALLATIONS

Drawing references				Interference references				Description of Interference	
Plan No. (GR_XXX)	Section Drawing No. (GR_XXX)	Works Finishes Drawing No. (GR_XXX)	Possible Access Routes & Work Areas Drawing No. (GR_XXX)	Watercourse No.	Interference Type	Interference Reference	Location & Channel Chainage (m)	Scheme Element Chainage (m) (DS-US)	General Description of Proposed Works
203	N/A	N/A	501	C01	P	C01_P01	5300	-	Proposed local surface water pumping station, collector drain, manhole and rising main to be installed for operation during a flood event at C01_5300. All outlets to be fitted with non-return valves.
204	N/A	N/A	501	C08	P	C08_P01	790	-	Proposed local surface water pumping station, collector drain, manhole and rising main to be installed for operation during a flood event at C08_790. All outlets to be fitted with non-return valves.
208	N/A	N/A	502	C01	P	C01_P02	3804	-	Proposed local surface water pumping station, collector drain, manhole and rising main to be installed for operation during a flood event at C01_3804. All outlets to be fitted with non-return valves.
208	N/A	N/A	502	C01	P	C01_P03	3444	-	Proposed local surface water pumping station, collector drain, manhole and rising main to be installed for operation during a flood event at C01_3444. All outlets to be fitted with non-return valves.
208	N/A	N/A	502	C01	P	C01_P04	3443	-	Proposed foul water pumping station, with overflow manhole and rising main to be installed for operation when required to pump foul water trapped in Meadowbrook Estate during a flood event into the foul network downstream of the estate.
211	N/A	N/A	502	C05	P	C05_P01	653	-	Proposed local surface water pumping station, collector drain, manhole and rising main to be installed for operation during a flood event at C05_653. All outlets to be fitted with non-return valves.

214	N/A	N/A	503	C01	P	C01_P05	2030	-	Proposed local surface water pumping station, collector drain, manhole and rising main to be installed for operation during a flood event. All outlets to be fitted with non-return valves.

SCHEDULE A: ROADS / REGRADING

Drawing references				Interference references				Description of Interference	
Plan No. (GR_XXX)	Section Drawing No. (GR_XXX)	Works Finishes Drawing No. (GR_XXX)	Possible Access Routes & Work Areas Drawing No. (GR_XXX)	Watercourse No.	Interference Type	Interference Reference	Location & Channel Chainage (m)	Scheme Element Chainage (m) (DS-US)	General Description of Proposed Works
201	301	N/A	501	C09	R	C09_R01	129 to 146	0 to 23	Regrading of existing ground to facilitate the construction of the proposed new culvert. Ground levels to tie into existing levels on either side of the proposed culvert.
206, 207	302	N/A	501, 502	C07	R	C07_R01	46 to 99	0 to 95	Proposed road regrading on the R639 to facilitate the construction of the replacement Cois Na Gleann Stream culvert under the R639 road.
206, 207	N/A	N/A	502	C01	R	C01_R01	3995 to 4036	0 to 61	Proposed flood relief channel to be constructed with engineered grassed slopes.
207	303	N/A	502	C01	R	C01_R02	3951 to 3980	0 to 27	Proposed flood relief channel to be constructed with engineered grassed slopes.
207	304	N/A	502	C01	R	C01_R03	3852 to 3933	0 to 90	Regrading of existing ground to facilitate the construction of the proposed new bridge. Ground levels to tie into existing levels on either side of the proposed bridge. Service diversions associated with road regrading will be required.
208	305	N/A	502	C06	R	C06_R01	87 to 106	0 to 74	Localised road regrading to facilitate the construction of the replacement Springmount Stream culvert across the R639 road.
208	306	N/A	502	C01	R	C01_R04	3426 to 3437	0 to 76	Proposed localised road and footpath regrading and re-cambering to divert surface water runoff during a flood event southwards into the Glashaboy River via O'Callaghan Park, downstream of Riverstown Bridge.
208	306	N/A	502	C01	R	C01_R04b	3437	0 to 17	Proposed localised regrading and re-cambering of the existing footpath.
208	306	N/A	502	C01	R	C01_R04a	3431 to 3466	0 to 55	Proposed localised road (inc. footpath) regrading and re-cambering to divert surface water runoff during a flood event southwards into the Glashaboy River.

Drawing references				Interference references				Description of Interference	
Plan No. (GR_XXX)	Section Drawing No. (GR_XXX)	Works Finishes Drawing No. (GR_XXX)	Possible Access Routes & Work Areas Drawing No. (GR_XXX)	Watercourse No.	Interference Type	Interference Reference	Location & Channel Chainage (m)	Scheme Element Chainage (m) (DS-US)	General Description of Proposed Works
209	N/A	N/A	502	C04	R	C04_R01	-	0 to 18	Proposed localised road and footpath regarding.
209	N/A	N/A	502	C04	R	C04_R02	144 to 158	0 to 14	Proposed localised road and footpath regarding.
209, 210	N/A	N/A	502	C05	R	C05_R04	90 to 113	0 to 23	Minimal landscaping and regrading of ground levels, to facilitate overland flow on Brooklodge Grove back into the Glenmore Stream.
211	307	N/A	502	C05	R	C05_R01	571 to 703	0 to 121	Brooklodge Grove road to be regraded to facilitate the construction of the proposed replacement culvert Including minor regrading and landscaping to adjoining gardens and driveways.
211	307	N/A	502	C05	R	C05_R02	580 to 604	0 to 24	Entrance to Copper Valley Vue to be regraded to facilitate the construction of the proposed replacement bridge.
216	307	N/A	502	C05	R	C05_R05	914 to 1021	0 to 107	The New Line, Brooklodge Grove and the junction between the two roads to be regraded to facilitate the construction of the proposed replacement culvert. Overland flow to be diverted back into the Glenmore Stream to the east of the proposed New Line bridge.
214	308	N/A	503	C01	R	C01_R06	2012 to 2073	0 to 48	Proposed lay-by for service and maintenance vehicles only to access proposed surface water pumping station.

SCHEDULE A: SLICES

Drawing references				Interference references				Description of Interference	
Plan No. (GR_XXX)	Section Drawing No. (GR_XXX)	Works Finishes Drawing No. (GR_XXX)	Possible Access Routes & Work Areas Drawing No. (GR_XXX)	Watercourse No.	Interference Type	Interference Reference	Location & Channel Chainage (m)	Scheme Element Chainage (m) (DS-US)	General Description of Proposed Works
203, 204	302	401	501	C08	SL	C08_SL01	857	-	Proposed flow control structure on the Mill Race. The Structure will be fitted with a penstock to facilitate maintenance of the Mill Race. A base flow will be maintained in the Mill Race at all times.

Arterial Drainage Acts, 1945 and 1995

Glashaboy River (Glanmire/Sallybrook) Drainage Scheme

In the County of Cork

Schedule B

This schedule consists of lands proposed to be compulsorily acquired or substantially interfered with, the easements, fisheries, water rights, navigation rights and other rights proposed to be compulsorily acquired, restricted, terminated or otherwise interfered with and the roads and bridges (whether public or private) proposed to be diverted, removed or otherwise interfered with. The reputed proprietors, owners and rated or other occupiers of the several lands proposed to be compulsorily acquired or substantially interfered with and of several easements, fisheries, water rights, navigation rights and other rights and private roads and bridges proposed to be compulsorily acquired, restricted, terminated or otherwise interfered with are set forth.

All levels quoted are to Malin Head datum.

Arterial Drainage Acts, 1945 and 1995

Glashaboy River (Glanmire/Sallybrook) Drainage Scheme

In the County of Cork

Schedule B1

This schedule consists of easements, fisheries, water-rights, navigation rights and other rights which are to be interfered with and a description of the Interference with the Right.

INDEX TO SCHEDULE B1

PAGE

LISTING OF RIGHTS AND ASSOCIATED INTERFERENCES

288

SCHEDULE B.1. LISTING OF EASEMENTS, FISHERIES, WATER-RIGHTS, NAVIGATION RIGHTS, AND OTHER RIGHTS WHICH ARE TO BE INTERFERED WITH

Right	Interference with Right
Fishing Rights.	Fishing Rights: Access to the Glashaboy River and tributaries will be interfered with by the construction of flood defences such as walls or embankments.
Rights of Way	Rights of way. Rights of way that exist on properties being interfered with by the works may be interfered with by the proposed works.
Right of owner or occupier to refuse third party permission to enter on the property.	Power of entry. Once the Scheme is confirmed, the Commissioners of Public Works, their officers, servants, agents and contractors, will have the right of entry on to the property to carry out construction, inspection, maintenance, modification, and any other works deemed necessary by the Commissioners in connection with the Drainage Scheme, and they will have the right to bring any equipment and machinery deemed necessary to carry out such works on to the property.
Right of owner or occupier to carry out any works on the property, whether such works require Planning Permission or not, and, whether such works require the permission of other parties or not.	Works which would interfere with any works completed as part of the scheme. Once the scheme is confirmed, no person may carry out any works which would interfere with the flood defences or any other works completed as part of the scheme unless they have first obtained the consent of the Commissioners under section 9 of the Arterial Drainage (Amendment) Act of 1995
Right of owner or occupier to carry out any works on the property, whether such works require Planning Permission or not, and, whether such works require the permission of other parties or not.	Works which would interfere with Access to the Drainage Scheme. Once the scheme is confirmed, no person may carry out any works which would prevent the Commissioners of Public works (or their officers, servants, agents or contractors) from gaining access to the Drainage Scheme Works for the purpose of carrying out maintenance of the works.
Right of owner or occupier to own materials which are part of the land or property.	After the scheme is confirmed, for the purpose of carrying out the Scheme the Commissioners of Public Works, their officers, servants, agents and contractors, will have the power to remove sods and other materials from the land, to deposit materials on the land, to use such materials in the course of carrying out the scheme and to do any such thing as deemed necessary or proper by the Commissioners for the carrying out of the scheme.
Right of owner or occupier to own land and own rights pertaining to the land.	After the scheme is confirmed, the Commissioners of Public Works may, if an order is made by the Minister, compulsorily acquire lands or any rights
Wayleaves	Wayleaves. Wayleaves that exist on the properties being interfered with by the works may be interfered with by the proposed works
Right of owner or occupier to use land for purposes which are agricultural in nature.	Embankments constructed as part of the scheme should not be tilled or planted with any vegetation except grass. Grazing the embankments, particularly by heavy animals such as cattle or horses could cause damage to the embankments. If this were to occur, such activity would be restricted.

Right	Interference with Right
<p>Rights of Utility Owners who have Rights of Way or Wayleaves associated with construction, maintenance, replacement, and other works in connection with utilities and utility infrastructure that may be existing, planned, or may be planned in the future on properties where scheme works are being carried out.</p>	<p>Existing Utilities and Utility Infrastructure that cause an obstruction to the construction of the Drainage Scheme works will need to be relocated to facilitate the construction of the works. It will be necessary to relocate Utilities or Utility infrastructure that would interfere with the safe construction or maintenance of the works.</p> <p>Future utilities or utility infrastructure may not be installed or constructed in a way which interferes with any element of the Drainage Scheme works, nor which would interfere with the safe maintenance of the works, unless consent has been obtained from the Commissioners of Public Works under Section 9 of the Arterial Drainage (Amendment) Act of 1995.</p> <p>Existing utilities and utility infrastructure which would adversely affect the integrity of elements of the Drainage Scheme works will need to be modified so that the elements of the Drainage Scheme works carry out their intended function.</p>

Arterial Drainage Acts, 1945 and 1995

Glashaboy River (Glanmire/Sallybrook) Drainage Scheme

In the County of Cork

Schedule C

The respective aggregate annual values (at the time of preparation of the scheme) of the portions of the benefited lands situated in the County of Cork and the several total increases in the annual values of those portions respectively which will probably arise in the consequence of the execution of the scheme.
