Ramelton Flood Relief Scheme

Newsletter September 2021

IN THIS ISSUE

Project Purpose

The purpose of the Ramelton Flood Relief Scheme is to alleviate the risk of flooding to the Community of Ramelton by providing a scheme that is technically, socially, environmentally and economically acceptable.

Project Introduction

A brief overview of the background to the project and how we got here.

Project Introduction

Donegal County Council as the Lead Authority and The Office of Public Works (OPW) are now advancing with the Ramelton Flood Relief Scheme.

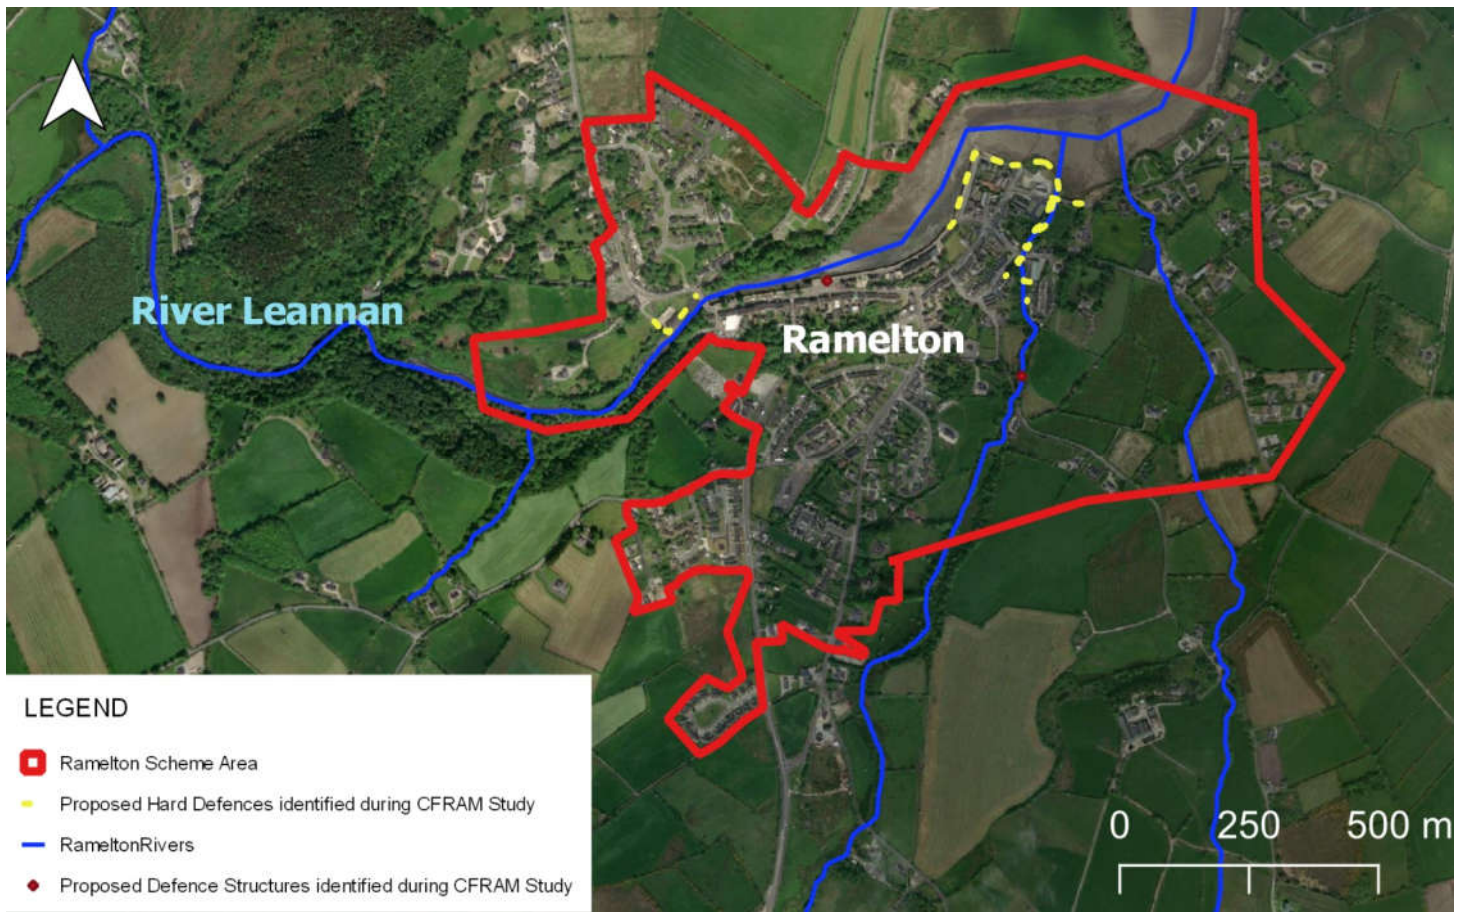

The OPW has recommended the development of a Flood Relief Scheme for Ramelton a result of the work completed in the North Western-Neagh-Bann Catchment Flood Risk Assessment and Management (CFRAM) Study.

This Flood Relief Scheme is part of the €1bn National Fund announced by the Government for Flood Relief Schemes throughout the Country in May 2018. Ramelton is situated within County Donegal.

Donegal County Council commissioned ByrneLooby in May 2021, to develop and implement a Flood Relief Scheme for Ramelton.

Scheme Area

The Scheme Area is defined above for the Project including the River Leannan and its tributaries. The Study Area will include any areas that require hydrological or environmental assessment as part of the scheme. This is expected to be at a minimum the Leannan Catchment draining to the Scheme Area as well as local rivers.

Consideration will also be given to measures located outside of the scheme area that provide flood mitigation for the outlined area.

Environmental Work

The development of a viable scheme will require detailed environmental assessments including baseline surveys of terrestrial and aquatic ecology, archaeological and cultural heritage, landscape, and water quality. These will lead to a Constraints Report to help define an acceptable scheme. The identification and management of any potential environmental impacts will be set out in a Natura Impact Statement and an Environmental Impact Assessment Report.

Public Engagement Event

Location Online at:

<https://www.floodinfo.ie/frs/en/ramelton/project-info/public-engagement/>

Date: September 27th to 22nd October 2021

The purpose of this event is to introduce the project team, outline the process for delivering the scheme and gather valuable local knowledge from stakeholders and the public. The public information is essential in achieving this project objective and we are seeking any initial views on key issues relating to the scheme or previous flood events.

Face-to-face meetings can be arranged for 13th October 2021 from 6pm to 8pm upon request and strictly by appointment only. Call Donegal County Council Flood Relief Schemes Unit on 074 9153900 or email floodreliefschemes@donegalcoco.ie

What's Next?

Over the next few months, the Project Team will be working on:

- ➔ Data collection
- ➔ Carrying out environmental and hydrometric river surveys
- ➔ Condition Surveys of Existing Defences
- ➔ Public Engagement Event
- ➔ Hydrology - Analysis of river and rainfall data including past flood events to be used in the design.
- ➔ Hydraulic Modelling of Rivers to simulate flood scenarios and the performance of flood mitigation measures
