

Raven Terrace and the Canal Walk are residential areas with a historic waterfront, at risk from tidal flooding. The proposed measures aim to protect properties and infrastructure while preserving the area's historic quay walls and enhancing its value as a space for cycling, walking, community activities and public use.

### Raven Terrace Considerations

### Emerging Preferred Scheme Setback Wall

This option consists of a flood defence wall along the canal at the Canal Walk. In Raven Terrace, the wall is behind the canal-side footpath. The road is protected up to the Standard of Protection of this scheme.

- 2 Existing railing fully retained
- 3 Existing car parking space removed
- 4 0.9m flood defence wall above existing ground
- 5 1m flood gate above existing ground

### Option: Raven Terrace

The artist's impression proposals shown above are intended for illustrative purposes only. The Emerging Preferred Scheme will be subject to detailed design, including but not limited to technical assessments, planning approvals, further public and stakeholder engagement, and other statutory or regulatory requirements. The construction materials used, and finish/visual appearance of features may differ from those illustrated. Consultation with other ongoing GCC infrastructure projects will continue to ensure alignment with the Emerging Preferred Scheme.
